J.J. Keller's Motorized Pallet Jacks: Safe Operation takes a unique approach to training by taking operators through a typical workday – including the potential dangers they'll face along the way. It also addresses the classroom training requirements specific to both "walkie" and "walkie-rider" model motorized pallet jacks.

The program teaches safe operating procedures that will help operators avoid the most commonly reported pallet jack incidents, such as getting crushed between the jack and a fixed object, suffering broken bones from being thrown from a "walkie-rider" or being crushed by the equipment after falling off a loading dock.

KEY TOPICS INCLUDE:

- Conducting pre-use inspections
- Picking up a load
- Traveling with a load
- Using the basic functions and controls
- Negotiating intersections
- Making safe turns
- Traveling on ramps and inclines
- Delivering a load
- Parking safely
- Shutting down and preparing the pallet jack for the next day's use.

PROGRAM COMPONENTS

DVD program includes:

- 1 20-minute, closed captioned video
- 1 Trainer Tools CD-ROM
- 1 Trainer Guide
- 11 Operator Handbooks
- 1 Awareness Poster

MHA Member Price \$356
(retail \$395)
